CELEBRATING OUR FIRST DECADE IN EDUCATIONAL TECHNOLOGY!

For the past ten years Scholastic has been at the forefront of educational technology, growing with you and with developing technologies. Today we launch into the 90s with exciting new programs for Macintosh, videodisc, and networks. And our commitment to service continues with a variety of flexible policies and options that enable you to put together the best software solution possible. We call it the Scholastic Advantage, and it is yours with every program!

OUR PROGRAMS ARE THE RESULT OF YOUR IDEAS!

Classroom teachers have always been our main source of ideas. In addition to your letters and our conversations with you at conventions, we are advised by a group of prominent computer educators, our National Advisory Board. The board includes Henry Jay Becker, Johns Hopkins University; Leroy Finkel, San Mateo County Board of Education; Kay Gore, Education Consultant; Claire Graham, Framingham State College; Beverly Hunter, National Science Foundation; Carol Klenow, Oakland Schools (MI); Stephen Marcus, University of California, Santa Barbara; Alan November, Glenbrook High Schools (IL); and Bernajean Porter, Education Consultant.

OUR SOFTWARE IS DESIGNED FOR YOUR CLASSROOM COMPUTERS.

Scholastic software is available for the computers and equipment most popular in the classroom, including Apple IIs, Apple IIGS, MS-DOS, and Macintosh, as well as networks and videodisc players. In this catalog keyed symbols make it easy to identify on which computers our programs run. And system requirements provide a list of everything necessary to use each program.

OUR PROFESSIONAL STAFF IS READY TO LEND A HAND!

From our Regional Coordinators of Educational Technology who can work with your district to create software solutions customized to your needs and your budget, to the Scholastic Sales Representative who visits your school, to the Scholastic

Authorized Education Dealer in your town, to our consultants who conduct technology seminars and teacher training, to the person who answers our 800 number, our staff is ready to help your school find the best educational technology solution possible.

TRY ANY SCHOLASTIC PROGRAM FREE FOR 30 DAYS!

We were the first educational software publisher to offer the 30 Day Preview policy. We can make this offer for one simple reason: we're confident that our software will work effectively in your classroom. So try out any program with your students. If the program doesn't meet your needs, just return it. We'll either cancel your bill or provide a full refund.

OUR SOFTWARE IS GUARANTEED FOREVER, FOR FREE!

Every registered Scholastic program is backed by a Free Lifetime Warranty. If the disk becomes defective at any time, just send it back to us for a free replacement. No questions asked. No shipping and handling charge. To be eligible, please fill out and return the warranty registration card.

IF YOU NEED TECHNICAL ASSISTANCE, CALL US.

Our full-time technical support staff is ready to answer your technical questions about our software. Whether you need help installing a program or using a certain feature, call us at 800-541-5513. We'll get you up and running in no time.

ic Advantage

OUR FLEXIBLE BUYING OPTIONS FIT EVERY NEED AND BUDGET.

After ten years in the educational technology business, we've done a lot of listening. You've told us that you need flexibility to make software purchasing as easy as possible. We offer many buying options so you can customize purchasing to match your needs. A list of all the Scholastic buying options follows. If you need help deciding what's the best option for you, give us a call. We'll help you put together the most economical package possible.

TEACHER'S EDITION

This complete resource includes a copy of the software, a User's Manual, and a Teaching Guide with ideas for ways to use the program effectively in the classroom. Our comprehensive Teaching Guides help even the technology novice feel comfortable using Scholastic software.

Need a few additional copies of the program?

If you would like to use the program on more than one computer, there is no need to buy the entire package again. We offer two inexpensive ways to get additional copies of the program:

ADDITIONAL DISKS

You can purchase additional copies of the disks for every Scholastic program. Just tell us how many copies you would like, and we'll put together a lab pack customized to your classroom needs.

ADDITIONAL HARD DISK LICENSES

Many computer systems enable you to run our programs from a hard disk drive. For these programs you may purchase a license that permits you to copy the programs onto a specified number of additional hard disks.

SITE LICENSES

For situations where you want to equip a large number of computers with a program, a site license may be more economical. The site license enables you to make as many copies of a program and documentation as you wish for use in your school.

NETWORK VERSIONS

We were the first educational software publisher to develop network software that really takes advantage of local area networks. For example we introduced the popular electronic mail feature in The Bank Street Writer III. We support all the major network systems being used in schools today. For more information see the inside back cover.

SuperPrint for the Macintosh NEW

The Macintosh sparks new creativity with classroom posters, banners, cards, and calendars.

GRADES MAC MAC

Now the ease of use, design flexibility, and fun that have made *SuperPrint!* so popular are enhanced with all the power and flair of the Macintosh. A remarkably easy-to-use Macintosh interface, fantastic new Mac graphics, improved word processing capabilities, and higher quality printing make *SuperPrint for the Macintosh* the most versatile and powerful classroom print program available for your classroom. Select from four types of designs: posters, banners, cards, and calendars. The diverse Mac graphics library includes people, animals, holidays, maps, food, and more. And a toolbox of creative resources lets you be as creative as you can be.

Teacher's Edition	DAR85189	\$149.95	\$119.95
Additional Disks	DAR85199	Split in an	\$30.00

For site license information call your Scholastic Authorized Education Dealer.

Features

- A remarkably easy-to-use Macintosh interface
- A library of playful Mac clip art, borders, fonts, and backgrounds
- Full-featured paint program
- Ability to import graphics from other Mac programs, including Springboard Works of Art (page 12)
- Freedom to place text and graphics anywhere in your design
- Freedom to edit text at any time
- A variety of print sizes, from Miniature to Mega, in black and white or color
- Compatibility with the printers popular in classrooms

Components: Two disks (not copy-protected) and Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Macintosh—1MB.

Scholastic

SuperPrint II

Decorate your classroom and enhance your curriculum with the most colorful graphics print program around!

When it comes to creating colorful and fun banners, Big Books, posters, calendars, bulletin boards, maps, puppets, and greeting cards, nothing beats *SuperPrint II*. You design and print your creations in just a few easy steps. First browse in the graphics library of people, animals, seasons, space aliens, dinosaurs, and more. Or draw and paint your own art. Then place graphics and text anywhere you like. And finally print in a variety of sizes.

Teachers publish their own Big Books and number lines and use the U.S. and world maps as presentation tools. Students discover the magic of publishing as they combine their writing with graphics. And everyone in school creates fantastic signs and banners for any occasion!

- Printouts from super-small to super-large—up to six feet tall!
- Printing in black and white, or in color (Apple® only, using ImageWriter® II)
- · Easy on-screen editing

Components: 5.25"—one program disk, two graphics disks; 3.5"—one program/graphics disk; (all disks not copy-protected); Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional program and graphics disks.

System Requirements: Apple—128K, MS-DOS—256K with Color Graphics Card.

Features

- An easy-to-use format with helpful on-screen instructions
- A graphics library of playful characters, designs, and illustrations
- Full-featured drawing and paint program
- Scrolling feature to scan a design and add creative flourishes along the way

CLASSROOM PUBLISHING/PRESENTATION

Scholastic

HyperScreen 2.0 GRADES 7-12

GRADES ₩ Ø 7-12 **★ №**

Combine text, graphics, speech, sound, special effects, and even videodisc into interactive computer presentations!

Teachers and students across the country have discovered a new way to present information: *HyperScreen* presentations. In New York, students created them to demonstrate their science fair projects. Teachers in Indiana used *HyperScreen* with a videodisc player to present lessons and to create tutorials for students who missed class or who needed additional review. And for students in Massachusetts, producing *HyperScreen* presentations provided a refreshing alternative to the traditional history paper.

HyperScreen provides a new way to put together information. Write text about a topic. Add graphics, backgrounds, color, sound, and music. And with the program's most intriguing feature, link a word or picture to a window of text, to another screen, even to a clip from a videodisc. To activate the link, all the user needs to do is click on it. It's called hypertext, and it is what opens HyperScreen up to so many applications in the classroom, from teacher tutorials to student reports. Presentations are self-booting so anyone with a compatible computer can view them.

Features

- Clip art, backgrounds, fonts, music, and sound effects
- · Full-featured drawing and paint program
- Special speech and scanner features for students with special needs
- Techniques for testing and evaluating student understanding, including text string recognition and a score-keeping function
- Compatibility with Apple II Video Overlay Card to combine titles and graphics with full motion video!
- Additional graphics and sounds available with Scholastic Graphics and Sound Booster Packs (see page 11)

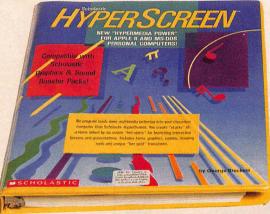

Components: 5.25"—one program disk, one graphics/fonts/sound disk, one sample stacks disk; 3.5"—one program/graphics/fonts/sound/sample stacks disk; (all disks not copy-protected); User's Guide, Teaching Guide. Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks. System Requirements: Apple—128K, MS-DOS—256K with Color Graphics Card.

Hostages presentation by Brian Woodcock, Grade 8, Dighton Middle School, North Dighton, MA

Slide Shop

Computer slide shows give students new ways to present their ideas!

This fun tool adds an exciting new element to student reports: computer "slide shows"! Whatever the subject, students can enhance their projects with engaging computer-based slide shows, complete with color, sound, and special effects!

Students design slide screens using a variety of creative tools and resources. Then they script their show, indicating the order of screens and the special effects transitions they would like. Maybe a mysterious fade to black. Or one of the zany dissolves or flickers. Then it's show time.

Slide Shop shows are self-booting so anyone with a compatible computer can run them without needing the program disk. Presentations can be transferred to videotape or printed for handouts or overhead transparencies. And with the Apple II Video Overlay Card, you can combine Slide Shop graphics and titles with full motion video! A great introduction to computer presentation for younger students and computer novices.

Designed and developed by George Brackett

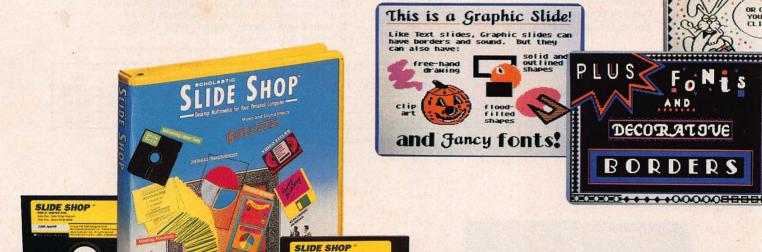

Features

- A wide variety of clip art, backgrounds, fonts, music, and sounds
- Full-featured drawing program
- More than 40 special effects transitions
- Comprehensive Teaching Guide with classroom activities to help introduce the program to your students
- Additional graphics and sounds available with Scholastic Graphics and Sound Booster Packs

Components: 5.25"—one program disk, two graphics/ sounds disks; 3.5"—one program/graphics/sounds disk; (all disks not copy-protected); Teaching Guide; *A Guide to Effective Presentations*.

Scholastic Edition Springboard Publisher™ II

All the desktop publishing power your school will ever need!

7-12 MAC

There are a lot of sophisticated desktop publishing programs out there. But most have more features than you need and cost more than you want to spend. This inexpensive and exceptionally easy-to-use program provides just the right amount of design and publishing power necessary to produce those everyday school newsletters, signs, posters, newspapers, and assembly programs.

Start with text from any word processor. Add design elements like columns and borders. Select from existing graphics or create your own with the drawing and painting tools provided. Place art wherever you like. And feel free to edit text or graphics at any time. Suddenly even the most basic page is transformed from the ordinary to the extraordinary!

Springboard Publisher II © copyright 1990 Spinnaker Software Corporation. Springboard Publisher is a trademark of Spinnaker Software Corporation. SmartArt is a trademark of Emerald City Software.

Features

- Ability to import graphics from most graphics programs
- Automatic text flow around graphics and irregular shapes
- SmartArt ™ text effects to rotate, shadow, arc, fade, or even stretch text
- · Tools to resize, shade, and move graphics
- Text editing features including an 80,000-word spell checker
- A search and replace function
- A typing window for fast text entry and editing
- Font sizes from tiny to huge (4 to 127 points)
- Built-in template documents
- A series of guided exercises to introduce the features of the program

Components: Two disks (not copy-protected), Teaching Guide

Additional Copies: If you plan to use this program on more than one computer, "per hard disk" licenses are available at reduced prices.

System Requirements: Macintosh—1.5MB.

And for over 1,000 additional graphics for your Springboard Publisher creations...

Works of Art Assortment Series Sampler Graphics of business, celebrations, computers, farms, foods, holidays, home, kids, maps, music, pets, religion, school, sports, and vehicles.

Works of Art Education Series Sampler Graphics of anatomy, artists, astronomy, birds, dinosaurs, fish, government, history, insects, inventions, literature, mammals, maps, meteorology, mollusks, money, music, plants, reptiles, science, shop, supplies, and tools.

Works of Art Holiday Series Sampler Art for birthdays, Christmas, Easter, graduation, national holidays, New Year's, St. Patrick's Day, Thanksgiving, vacations, Valentine's Day, and weddings.

Springboard Publisher Templates

Three dozen professionally designed newsletter templates. Includes one-page and multiple-page designs. Just add your own text and graphics for great results.

"...provides so much power for so little money."

—Leslie Eiser, Classroom Computer Learning

Success with Typing[®]

The easiest way to learn typing is now also the best way to learn computer keyboarding skills. GRADES

Learning both touch-typing and keyboarding is simple with this innovative, easy-to-use software. Twenty lessons, stories, and tests follow the research-based developmental method, but give it an interesting twist: Your students learn to type by using stories that pertain to their own experiences rather than the typical practice paragraphs found in other programs.

Add to this yet another unique feature: Students master general typing skills and are introduced to computer keys, including those with special applications.

Additional program features include:

- Feedback after each lesson that advises students to repeat the lesson or proceed
- Reminder message that tells students what to do when they begin a new lesson
- Immediate feedback on incorrectly hit keys
- Speed and accuracy drills and tests
- Option that allows teachers to create their own tests
- · Record-keeping feature that can be printed out

Components: Two program disks with backups, Teaching Guide.

System Requirements: Apple—64K, MS-DOS -128K. MS-DOS requires Color Graphics Card.

GRADES

Rainbow Keyboarding

Teach important computer skills in an enjoyable, effective new way!

Deep in an enchanted forest, at the end of a rainbow, a space creature falls to Earth. He cannot return home without the children's help. Thus begins the imaginative tale that weaves through this program, capturing the interest of students as it improves their computer keyboarding skills.

One by one, magical forest-dwellers introduce children to useful keyboarding skills. With the goaloriented workbook, Keyboard-on-the-Wall, and an optional software program, your students easily master the skills needed to send the friendly space

RAINBOW KEYBOARDING

RAINBOW KEYBOARDING

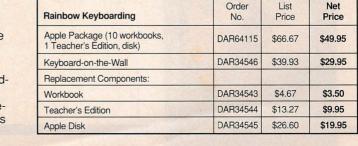

creature home.

At every turn, the children engage in fun-filled, skill-building activities: placing sticker keys on the Keyboard-on-the-Wall, reading rhythmic poems as they type, writing messages to outer space, and increasing their keyboarding speed and accuracy with the optional software program.

Package Components: Ten 64-page workbooks, one 80-page Annotated Teacher's Edition with lesson plans for each chapter of the workbooks, one program disk. Additional Component: 3' x 3 3/4' rainbow-colored

The Bank Street Writer NEW for the Macintosh GRADES 2 10

GRADES M @ 3-12 MAC

The classic school word processor comes to the Macintosh!

Eight years ago, *The Bank Street Writer* revolutionized writing in schools. This remarkably easy-to-use word processor, designed *by* teachers *for* teachers and students, introduced the freedom of writing on the computer to millions. Now this classic program comes to the Macintosh, and the result is just as revolutionary.

The program includes all of the Macintosh word processing features you would expect, including multiple fonts and styles, cut and paste editing, multiple windows, and paragraph rulers. But unlike any other Mac word processor available, the new Bank Street Writer includes unique features designed specially for the classroom. And it can read your Bank Street Writer III files. More than just another word processor, The Bank Street Writer for the Macintosh is the writing processor for the 90s!

Features

- Hypertext lets you insert anywhere in a document a "button" that connects the reader to a note, another file, or a picture! Think of the buttons as electronic "post-its"!
- Classroom Publishing feature lets students publish their writing in multicolumn newsletters, fliers, pamphlets, and stories. A variety of publishing templates are provided. And easy editing lets everyone develop their own layout templates!
- Sound capability enables you to place "buttons" in your documents that play back sounds when activated. Taking advantage of the Macintosh sound input capability, the program integrates sound into the writing process!
- Import text files from other word processors, including your Bank Street Writer III files.
- Integrated electronic mail (in the AppleTalk network version) enables everyone to communicate with people at other Macs or Apple IIs connected to the network.

Other Features Include

- Ability to import graphics with text wraparound
- Full-color support
- On-line spelling checker and thesaurus
- · On-line punctuation and usage guide
- "Frozen text" to create prompted assignments students cannot modify
- A picture gallery of clip art and graphics

Components: Disks (not copy-protected) and Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Macintosh—1MB.

The Bank Street Writer III

3-12 **6 5**

The pioneering word processor that adds freedom and excitement to writing assignments

The first word processor developed for school use, the original Bank Street Writer introduced the computer and the word processor to millions of students and teachers. Created by teachers for teachers and their students, the program in its latest version, The Bank Street Writer III, continues to be the most popular word processor in schools. Students quickly learn how to use the program and immediately discover the freedom it adds to their writing. No longer discouraged by the fear of failure or the drudgery of recopying, they are motivated to write more and improve their use of language in the best possible way: by using it. A comprehensive Teaching Guide helps teachers integrate the program into the classroom. And Scholastic's exclusive Writing Process Activities guide students through each stage of the writing process.

AppleTalk is a registered trademark of Apple Computer, Inc. SchoolMate is a registered trademark of the Tandy Corporation.

The Bank Street Prewriter

GRADES **② 5-12 ★**

BANK STREET

Writing instruction from the creators of The Bank Street Writer

This powerful tool steps students through the important first stage of the writing process. Brainstorming activities help students explore and focus possible ideas for writing projects. Prompted writing activities encourage students to flesh out their ideas for specific styles and types of writing such as stories, essays, and poems. And a full-featured Outlining program helps students organize and edit their ideas into an outline. Students can print their outlines or transfer them to *The Bank Street Writer III* or other word processors to proceed with writing the assignment.

Components: One program disk, one Activity disk (disks not copy-protected); Teaching Guide with Activities.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks. **System Requirements:** Apple—128K, MS-DOS—256K; printer recommended.

And for powerful add-on writing activities for use with The Bank Street Writer ...

Write On!"

An imaginative cure for the blank page

GRADES MAC MAC

These imaginative writing activities motivate and guide your students through each phase of the writing process. Driven by The Bank Street Writer or another word processor, the activities focus on story, poetry, journal, paragraph, and essay writing. The Literature and Novel Study Series are based on classic books and novels. The Language Enrichment and Skills Series are centered around group creative exercises and discussions. The end result is a program that teaches the writing process in a spirit of fun and participation.

Primary Literature Series (Grades K-4)

Great Imagination Series 5 titles including Where the Wild Things Are, The Napping House, and A Fly Went By.

Me and My World Series 9 titles including Quick as a Cricket, Just for You, and Ira Sleeps Over.

Elementary Series (Grades 4-6)

Literature Series 7 titles including The Velveteen Rabbit, If I Ran the World, and Paul Bunyan.

Language Enrichment Series 3 titles that develop rich poetry and expository writing.

The Scholastic

Process Writer

More than a word processor, a full-time writing coach for young writers!

This powerful program provides young students with a word processor plus their own computer-based writing coach to help them through the entire writing process! The program asks students the questions they need to answer in order to write and organize their assignments. Prompted writing activities guide students as they brainstorm ideas, develop outlines, create drafts, revise, edit, and finally print their compositions.

The Scholastic Process Writer gives your students specialized assistance for a variety of writing assignments, including descriptive paragraphs, book reports, persuasive essays, and stories. And a comprehensive series of flexible activities helps you integrate the program into your curriculum.

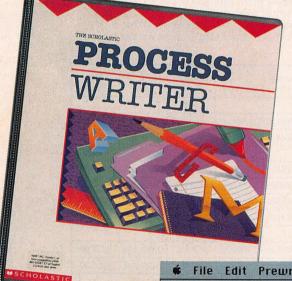

Features

- Easy-to-follow menus and on-screen instructions
- A full-featured word processor
- Evaluation tools to check sentence and paragraph structure
- A checker for clichés, homophones, and other common usage problems
- Ability to transfer files to other word processors for formatting and publishing
- Correlations to the writing strands of major basals
- A teacher utility to customize lessons, activities, idea banks, and word lists

Components: One 3.5" or two 5.25" program disks; one Teacher Utility disk; (all disks not copy-protected); 96-page Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Apple—128K, Macintosh—1MB, MS-DOS—256K.

Talking Text Writer

A whole language approach to developing reading and writing skills

In simplest terms, *Talking Text Writer* is a word processor. However, in classrooms across the country, this amazing talking software is dramatically *increasing time on task, building reading and writing skills*, and *encouraging language development* by combining reading, writing, and listening techniques.

Program features include:

- Synthesized speech that reads back everything students input—even made-up words
- Ability to repeat speech as often as needed (ideal for ESL or learning-delayed students)
- Adjustable volume and speaking rate

 Easy-to-use word processor that edits, stores, and prints written work

> Comment Box in which teachers can type instructions, remarks, or encouraging words that students can then read and hear

- Dictionary Box that pronounces words aloud and even reads their definitions
- Quick Start Tutorial (Apple only)—step-by-step guide to setting up the software

AWARD WINNER

Talking Text Library®

Designed especially for beginning and struggling readers

These grade-specific "talking" libraries read stories aloud while highlighting each word on the screen for students to follow.

Each library includes:

- Synthesized speech that reads at the student's own pace
- Delightful graphics to enhance involvement
- Print capability so students can reread the stories on their own and at home

Beginning Classics (K–1) Charming classics such as *The Three Billy Goats Gruff, The Gingerbread Man,* and *The Three Bears,* written in the predictable format youngsters enjoy.

Classics for Young Readers (2–3) Children's best-loved tales, such as Sleeping Beauty, Snow White and the Seven Dwarfs, and The Ugly Duckling.

Discover History (2–4) Fascinating stories on historical subjects, such as Christopher Columbus, Colonial America, Abraham Lincoln, and the American Indians.

K-4

Explore Science (2–4) Informative stories about dinosaurs, the planets, weather, and other science topics.

Components: One Library Read program disk plus backup, one Story disk, Teaching Guide.

System Requirements: Apple—128K; Echo or Cricket speech synthesizer board (see Ordering Information on page 21).

Features

- Humanlike, natural voice
- Words compiled from every major basal reading and spelling program
- Ability to customize spelling lists to meet individual curriculum goals
- Record-keeping feature that stores test results, including spelling list tested, percent correct, and words misspelled
- A complete 36-week basal spelling program for Grades 1–6

Components: Each core package includes one core program disk, Teaching Guide, grade specific spelling list disks. (All disks not copy-protected)

System Requirements: Apple—128K; Echo or Cricket speech synthesizer board (see Ordering Information below).

ESL Writer

An ESL-focused language processor

Based on five years of research, this powerful program helps ESL students strengthen their English language skills as they work on their own writing, at their own level of expertise in English. It blends the flexibility of a word processor with an ESL-focused grammar checker and spelling checker designed to meet the needs of ESL students, particularly those from Hispanic or Asian backgrounds. Students begin by typing in their thoughts. Then the program takes over, checking for the most common grammatical and spelling errors likely to found in their writing. As errors are highlighted on the screen, prompts help the students correct their own work.

Developed by Emerson and Stern Associates

Components: One program disk, Teacher Utility disk (disks not copy-protected), Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

Super Story Tree

GRADES № ②
3-6 **6** №

The imagination processor for young writers

Imaginations soar when students use this innovative creative writing tool to combine text, colorful illustrations, sound effects, and music into their own multimedia stories. They can type in a variety of fonts, add graphics anywhere they like, and even devise special effects page transitions. And with the program's exciting story branching feature, students can make their stories *interactive* by providing the reader with several story options at the end of a page.

Stories can be read on the screen—complete with all the visual and sound effects—or printed out in branching adventure format. Story disks are self-running so anyone with a compatible computer can read them. And a special scanner feature enables handicapped students to interact with the adventure by pushing the space bar when the desired option is highlighted. Adds an exciting new element to creative writing!

Features

- · Colorful graphics and backgrounds
- Drawing tools
- Zany sound effects and a symphony of musical options
- Printing in black and white, or in color (Apple only, with ImageWriter II)
- Access to hundreds of additional graphics and sounds with Scholastic Graphics and Sound Booster Packs (see page 11)

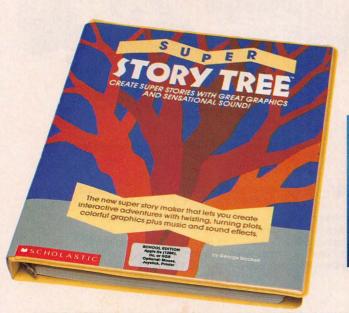

Components: 5.25"—one program disk, one graphics/sounds disk; 3.5"—one program/graphics/sounds disk; (disks not copy-protected); Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Apple—128K, MS-DOS—256K with Color Graphics Card.

Success with Literature

A Computer-Based Approach to Writing About Literature

GRADES № ②
7-12 **★ №**

Text and software work together to help students write about literature!

With this innovative series of programs, students explore works of literature by writing about them. Each program focuses on a different literary classic. While students are reading each work, they can refer to the Student Booklet which provides important background information about the author and the time period as well as the book's themes, characters, point of view, and other literary conventions.

Once students finish reading the work, they move to the software. A set of writing activities guides students through all the steps of writing an essay, from exploring a thesis to organizing, drafting, revising, and printing their paper. This unique combination of text and software motivates students to explore each work fully, develop a thesis, gather textual proof for their arguments, and ultimately gain a real understanding of the work. Success with Literature can be a valuable aid in class or a fantastic companion for independent study.

Each Teacher's Edition Features

- One Student Edition, called Scholastic Notes, which includes:
- A Student Booklet to help students better understand the work and choose a focus for their paper
- Software with complete word processing features for writing and printing drafts of papers
- —A unique Quote file with the software that helps students locate relevant quotations from the work and integrate them into their papers
- Teaching Guide with teaching suggestions and a variety of activities on both the writing process and the specific work

Additional copies of the Student Edition for each title are available at specially reduced prices.

Components: Teacher's Edition for each title includes the Student Edition (one program disk [not copy-protected] and one Student Booklet) and Teaching Guide with blackline masters.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional Student Editions.

System Requirements: Apple—128K, MS-DOS—256K.

Attention School Libraries!

A complete set of Student Editions of the *Success* with Literature series is now available at great savings. Make your library the resource for student literary research and writing!

Twistaplot Reading Adventures

GRADES 4-8 & MS

Students become truly involved while building reading, problem-solving, and planning skills.

Teachers everywhere have discovered Twistaplots—the powerful reading-skills builders. Because young readers love to make decisions that affect the plot, these tales stress content area reading and motivate as they educate. Students select their own paths through these branching stories, while they are mastering skills in critical thinking, story mapping, and learning about plot construction.

Tales of the Future

"MicroAgent of the Body Guard": Take a scientific journey through a human body. (Skills—science, math, mapping) "2088: An Oval Office Odyssey": Learn about the political process by running for President of the U.S. (Skills—social studies)

Tales of Fantasy

"The Frog and the Fables": Find the missing morals to the fables. (Skills—reading, reasoning, mapping) "The Dark Tower": Hunt for treasure in King Arthur's castle. (Skills—reading for details)

Tales of Daring

"Zazoo Come Home": Track a stolen short story and make a daring rescue. "The Funhouse Caper": Solve three mysteries to find the missing key. (Skills—reading for detail, deductive reasoning)

Tales from History

"The Shot Heard 'Round the World": Travel to Boston for the Revolutionary War. "Wagons West": Pioneers follow trails by covered wagon. (Skills—history, social studies, mapping)

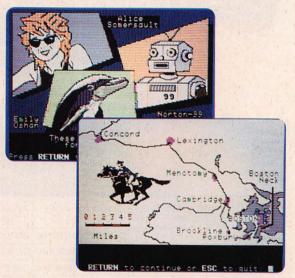

Tales of Suspense

"The History Mystery": Find the route out of the museum. (Skills—problem solving, mapping) "The Big Nap": Private detective cracks a case. (Skills—deductive reasoning)

Components: Apple—one program disk plus backup; MS-DOS—two program disks plus backups; Teaching Guide.

System Requirements: Apple—48K, MS-DOS—128K with Color Graphics Card.

All-time favorites!

Tales of Adventure

"Adventures in the Microzone": Discover the way out of a miniature state. (Skills—reading for detail) "Northwoods Adventure": Face the dangers of the great outdoors. (Skills—deductive reasoning)

Tales of Discovery

"Pirates of the Soft Seas": Experience an exciting treasure hunt. "Fossils Alive": Journey back to prehistoric times. (Skills—math, language arts, mapping)

Tales of Mystery

"Haunted House": Explore a spooky run-down mansion. "Mystery at Pinecrest Manor": Unravel clues and solve the mystery. (Skills—deductive reasoning, reading for detail)

Components: One program disk plus backup, Teaching Guide.

System Requirements: Apple—48K, IBM only—128K with Color Graphics Card.

Reading Explorers

Interactive reading adventures on the computer help improve reading and thinking skills.

GRADES **3**

These exciting reading adventures motivate reluctant readers with a special twist: they place the reader in the midst of a story. Students determine the outcome of *Reading Explorers* stories. They decide what door to open, what path to take, what materials to carry with them. The program reacts to their decisions and takes the reader and the story in whatever direction they choose.

As they navigate their way through a series of challenging situations, students encounter a variety of strange new people and places. Students can work either alone or in small groups. And a complete set of eight activity sheets, called Explorer's Logs, accompanies each story providing opportunities for discussion, writing, thinking, and expanding the activity to other curriculum areas.

Each Volume Features

- Two interactive reading adventures
- Two complete sets of Explorer's Logs
- · Lesson plans with stated learning objectives
- Answer keys
- Alternative teaching strategies

Volume 1

A Night at Fleeners, a sci-fi thriller set in a department store after closing. Word War, the horrible Verbal von Doom is mixing up clichés and proverbs.

Volume 2

World Agent, a tale of international espionage targets geography skills. The Mystery of the Olympic Imposters, a trip to the modern Olympic Games

Volume 3

The Myths of Olympus, a visit with the Greek gods in ancient Greece. Quest for the Pole, a historic journey to discover the North Pole.

Components: One program disk (not copy-protected) with two interactive stories, Teaching Guide with Explorer's Logs.

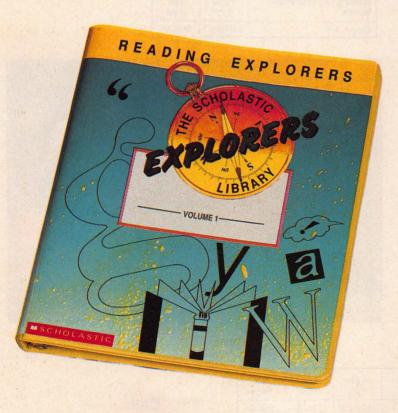

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Apple—128K.

By Gila Gevirtz with Jack Cassidy, Millersville University of Pennsylvania, former President, International Reading Association

Scholastic Reading Comprehension

Prepare your students for reading comprehension competency tests.

Move beyond the basal reading textbook with this interactive software program that motivates students to read as it improves their competency in eight essential reading comprehension skills:

- Literal recall of facts
- Understanding the main idea
- Searching for key words
- Putting events in order
- Sentence meaning
- Inferential thinking
- . Who, what, when, where, why, and how
- Drawing conclusions

This program is an excellent way to prepare students for standardized reading comprehension tests. It offers high-interest passages from such classics as Peter Pan, Little Women, and A Christmas Carol, and readings from contemporary books such as I Have a Dream: The Story of Martin Luther King, Charles in Charge, and Invasion of the Blue Lights.

Program features also include:

 Proven instructional method in reading comprehension that shows a story passage on screen with accompanying multiple-choice questions (the format found in most standardized reading tests)

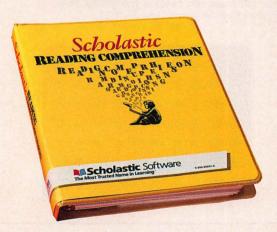

- · Interactive Help feature that assists students in locating clues to the answers in the text
- Choice of using included passage disks or the teacher's own story passages
- Record-keeping feature that summarizes students' strengths and weaknesses either on screen or printed out

Components: Each grade core package includes one core program disk and one utility disk with backup of each, Teaching Guide, one Passage Package for that grade. See below.

System Requirements: Apple-64K; printer recommended.

Reading Comprehension Core Packages	Apple 5.25	List Price	Net Price

Success with Reading®

Reinforce critical reading skills...and motivate vour students to read.

GRADES

Based on the cloze reading principle, this supplementary reading program with software presents high-interest fiction and nonfiction chosen by leading experts. Passages from the works are presented on screen with words and letters removed. Students fill in the missing words using context, syntax, spelling, and vocabulary clues. A unique Hint feature assures success for readers of all abilities and, at the same time, motivates them to read the six different books that are provided in each grade-level package.

Additional features include:

- Ability to individualize passages by adjusting the rate at which missing words reappear, by adding challenging gamelike features, and by turning sound and scoring on and off
- Option for teachers to enter their own passages for any reading or grade level
- Foreign language capability for adding passages in Spanish, French, or German
- Option to print cloze reading passages for individual desk work
- Full class-management option that helps teachers manage/maintain student progress

Components: Each grade core package includes one core program disk plus backup, Teaching Guide, one Passage Package for that grade.

System Requirements: Apple—48K, printer optional.

Math Shop[®] Series for the Macintosh

GRADES M ® 1-10 MAC

New Macintosh programs put your students' math skills to work!

Now the popular series that puts math into a fun real world setting comes to the Macintosh. Vivid colors and digitized images and sound give the series a whole new look and feel. As students help serve customers in different stores, they use a variety of math skills. They gain a sense of how math is applied in everyday life. And they develop important problem-solving strategies like trial and error, estimation, and the search for patterns.

Each Title Features

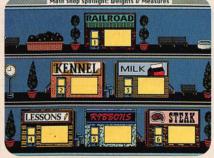

- Situations with hundreds of problems to capture student interest
- Automatically adjusting skill levels to match the needs of different students
- Immediate feedback to keep students interested and on track
- Pencil and paper activities to complete before or after using the program

Components: One disk (not copy-protected), Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Macintosh—1MB.

Math Shop Jr.

Students help out using skills in addition, subtraction, multiplication, division, odd and even numbers, estimation, and identifying coins. Grades 1–4.

Math Shop

Student shopkeepers use addition, subtraction, multiplication, division, fractions, decimals, percents, ratios, proportions, linear measures, coin values, base 2, equations with two variables, and functions. Grades 4–8.

Math Shop Spotlight: Weights & Measures

Transactions focus on pounds and ounces; feet and inches; cups, pints, quarts, and gallons; days and weeks; money and time (dollars and cents per hour); and meters and centimeters. Grades 4–8.

Math Shop Spotlight: Fractions & Decimals I Student employees add and subtract fractions, multiply fractions by whole numbers, find fractional parts of a given number, convert decimals to fractions, and add decimals. Grades 4–8.

Algebra Shop®

Both pre-algebra and algebra skills are needed in these stores. Tasks involve factoring, squares/square roots, cubes/cube roots, positive and negative numbers, fractions, decimals, and number series. Also simultaneous equations, solving for one and two variables, using composite functions, reducing equations, and using functions with two variables. Grades 7–10.

And for *Math Shop* programs for Apple II and MS-DOS...

Math Shop Series

Students use math skills in a real world setting!

GRADES M ②
1-10 ₩

Your math students are hired! We've got a mall full of busy shop owners who need their help. The orders of the day in each *Math Shop* store are math and problem-solving skills. Whether they are calculating the area of carpeting, loading a soda truck, or boxing cartons of eggs, your students will need to be on their toes and make maximum use of their math skills.

As they lend a hand in the fun "real world" environment of a shopping mall, students gain a sense of how math is applied in everyday life. Each title features hundreds of problems to capture student interest. Automatically adjusting skill levels enable you to match the needs of different students. Immediate feedback keeps students interested and on track. And pencil and paper activities are provided.

For the specific math skills covered in each program, see previous page.

Math Man[®]

A challenging approach to reinforcing basic arithmetic skills

This all-time favorite with students motivates them to practice addition, subtraction, multiplication, and division skills. Working against the clock, they move an animated construction worker on a network of beams and ladders by picking up the number and operation sign that matches a "target" number. The program provides different levels of difficulty to suit students' abilities. It also includes a Self-Test section for additional enrichment.

Math Man	Apple 5.25	MS-DOS 5.25	List Price	Net Price
Teacher's Edition	DAR95407	DAR95408	\$37.45	\$29.95

Components: One program disk plus backup, Teaching Guide.

System Requirements: Apple—48K, MS-DOS—128K. MS-DOS version requires game controller and Color Graphics Card. MS-DOS does not work on DOS resident machines or PS/2. Does not support MS-DOS joystick.

Quations

Critical math skills practice in a highly motivating format

This fast-paced Crossmath™ game uses the universal language of numbers to provide practice in basic math skills. A Choose-a-Level option determines the difficulty level at which the game is played.

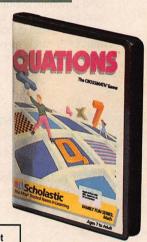

Up to three students play against the computer. At each turn, they score points by using as many number and operations "tiles" as possible to build equations vertically and horizontally. A built-in scorekeeper awards more points to students who use multiplication and division symbols in their equations.

Quations and Crossmath are trademarks of Andrew P. Mandell.

GRA	DES		

Components: One program disk plus backup, Teaching Guide, laminated game board (not essential to play). **System Requirements:** Apple—48K.

Math Assistant I and II

Pinpoint and diagnose student errors for more effective teaching.

Based on in-depth research and classroom testing, Math Assistant I and II cover the 80 most common student math errors—20 each in addition, subtraction, multiplication, and division. As students use these programs, the teacher can identify their weaknesses and prescribe the most effective remedial work.

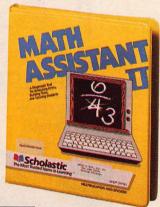

Math Assistant I provides error analysis in addition and subtraction for Grades 1–4. Math Assistant II provides error analysis in multiplication and division for Grades 3–6. Both programs provide excellent preparation for standardized math competency tests.

Scholastic

Math Tutor

Individualized math instruction for students who need extra help

Meet Professor Zigay. This intriguing-looking math tutor provides one-on-one direct instruction of specific math skills. First, a placement test determines where students need help. Ziggy then presents a problem concept on the screen. Students use this concept in a series of exercises. Their errors are clarified and additional instruction is provided until the skill is mastered. Then Ziggy moves on to the next logical skill.

There are no distracting procedures or screens just clear and concise instruction, reinforcement, and practice. Students determine the pace, so they can take as much time as they want on every question. And success is guaranteed because students can't move on to a new concept until they have mastered the one they are studying.

Features

- A management system to track and monitor student progress
- Worksheets to complete away from the computer

GRADES

Components: Each package contains program disks plus backup, Management disk, and Teaching Guide. Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks. System Requirements: Apple-64K, MS-DOSwith Color Graphics Card; printer recommended.

60

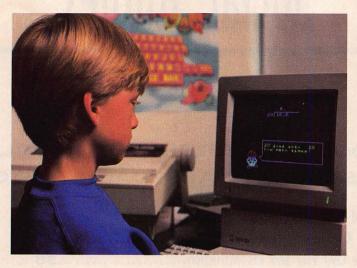

Addition 44 lessons on plus sign recognition, reading and writing equations, equality concepts, place value, column addition, renaming, and solving complex addition problems.

Subtraction 50 lessons on minus sign recognition, reading and writing equations, equality and subtraction concepts, place value, regrouping from zeros, and solving multi-digit subtraction problems.

Multiplication 43 lessons on multiplication facts, counting numbers other than one, algebra multiplication, column multiplication with and without renaming, multiplication with zeros, and solving complex multiplication problems.

Division 44 lessons on division facts with and without remainders, two- and three-digit quotients, estimating quotients, and estimating with the wrong quotient.

Fractions, Part I 23 lessons on numerator and denominator; proper and improper fractions, addition, subtraction, and multiplication of

fractions; mixed numbers; rewriting improper fractions; and equivalent fractions.

Fractions, Part II Continues Fractions, Part I. 24 lessons on least common multiple factors, greatest common factor, simplifying fractions, converting whole numbers to improper fractions or mixed numbers, and division of fractions.

Decimals 27 lessons on reading and writing decimals, equivalent decimals, decimal point alignment, addition and subtraction of ragged decimals, addition and subtraction of mixed decimals and whole numbers, rounding off decimals, multiplication and division of decimals, converting fractions to decimals, and converting decimals to fractions.

Percents, Ratios, and Proportions 19 lessons on calculating percents, converting percentages to decimal figures, converting decimals to percents, converting fractions to percents, ratios, and proportions.

The Scholastic History Processor An Overview of United States History

GRADES M @ 5-12 MAC

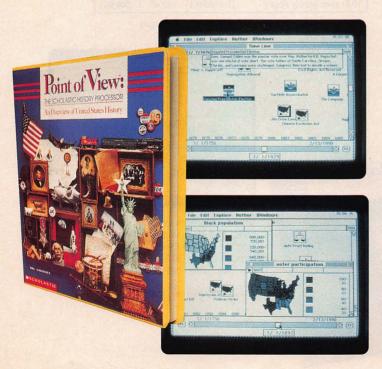

Students explore and learn history in an engaging multimedia environment!

This powerful information environment gives students and teachers easy access to a vast amount of historical data in the form of brief descriptions of important events or "milestones" in U.S. history, dynamic charts and maps, graphics, essays, documents, sound, and even video.

Students and teachers can use the program for research and exploration, navigating their own paths through the various forms of information. Political, economic, military, social, and cultural history are all addressed, enabling students to discover the interrelationships of historical events. But *Point of View* is far more than just a sophisticated database. A powerful authoring system lets you add your own information and link together any of the data to produce your own presentations and lessons.

Features

- A dynamic time line that enables students to scroll through history and explore a wide variety of interrelated events
- Thousands of milestones organized into 24 categories including Daily Life, U.S. Events, World Events, War, Education, and Literature
- Hundreds of primary source documents, photos, lithographs, paintings, maps, and political cartoons that provide a deeper sense of history
- Original essays and presentations that explore vital historical topics and provide ideas for your own presentations
- Full compatibility with any videodisc (CAV) to incorporate video clips into explorations and presentations
- Comprehensive Teaching Guide and Student Activity Book with activities to help you integrate the program into your classroom

Components: Disks (not copy-protected) and Teaching Guide

Additional Copies: If you plan to use this program on more than one computer, "per hard disk" licenses are available.

System Requirements: Macintosh—1MB. Requires a hard disk. Videodisc player optional.

New videodisc brings history to life!

History in Motion: Milestones of the 20th Century This 60-minute videodisc contains dozens of "minidocumentaries" highlighting important people and events of the 20th century. Materials are arranged both chronologically and thematically. Available either as a standalone (Level I) videodisc with bar code access or as an interactive (Level III) videodisc linked to *Point of View*.

Available Winter 1991

Point of View:

The Scholastic History Processor The Civil War and Reconstruction

GRADES N ® 5-12 MAC

A complete multimedia unit on the conflict that defined America!

This new program provides the backbone for a complete unit on the Civil War. Thousands of milestones chronicle the period from the perspectives of both sides of the conflict. Students "see" the war as they read firsthand accounts of battles written by commanding generals. They gain a sense of the spirit of the times in speeches, documents, and personal diary entries. And they explore a range of themes, including the abolition movement and emancipation, the South's struggle to form a new nation, and the controversial Reconstruction period.

The historical window chronicled by the program ranges from the 1850s and the rumblings of sectional strife through the 1880s and the institution of Jim Crow. Companion teacher and student handbooks provide a structured format to use the program in the classroom. And a full authoring system enables students and teachers to add their own information and to link together any of the program's rich resources into multimedia reports and lessons.

Features

Point of View:

- A dynamic time line that enables students to explore thousands of events from the period
- Hundreds of primary source documents, photos, lithographs, maps, and political cartoons that help to capture the spirit of the times
- Full compatibility with any CAV videodisc to incorporate video clips into explorations and presentations
- Original essays and presentations that explore vital historical topics and provide ideas for your own presentations

Components: Disks (not copy-protected) and Teaching Guide.

Additional Copies: If you plan to use this program on more than one computer, "per hard disk" licenses are available.

System Requirements: Macintosh—1MB. Requires a hard disk. Videodisc player optional.

When in the course of human events...

The Emancipation Proclamation Abraham Lincoln

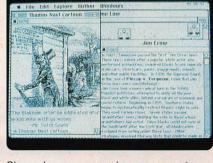

THE PRESIDENT OF THE UNITED STATES OF AMERICA: A P

Whereas, on the twenty-second day of September, in the year one thousand eight hundred and sixty two, a proclamation of the President of the United States, containing, among othe following, to wit:

That on the first day of January, in the year of our Lord eight hundred and sixty-three, all persons held as slaves or designated part of a State, the people whereof shall the against the United States, shall be then, thenceforward, at and the Executive Government of the United States, include and naval authority thereof, will recognize and maintain the such persons, and will do no act or acts to repress such persons.

them, in any efforts they may make for the That the Executive will, on the first day proclamation, designate the States and put he people thereof, shall on that day be, Congress of the United States by membrane.

"Point of View has the potential to change the way students will learn history in the future.... it is a teacher's dream." —Ruthanne Adams, History Teacher, Shrewsbury High School, Shrewsbury, MA

Share classroom experiences, presentations, and ideas with teachers nationwide with the special *Point of View* User's Conference on the GTE Education Network. For information call 800-634-5644.

Hidden Agenda™ Scholastic Edition

The simulation that puts the fate of a nation in your students' hands

Now your students can face the challenge of political office, right in your classroom! A revolution has placed them at the helm of the economically fragile and historically corrupt nation of Chimerica. Their mandate? To lead this emerging nation to political, economic, and social stability.

Their days are filled with encounters with diplomats, journalists, influentials, and others. Every decision they make has its ramifications...some good, some bad, some obvious, some not. As they "play the game" of politics, students grow to appreciate the complications and realities of government.

Features

- Domestic and foreign press let you know how your government is doing.
- Progress charts monitor economic and social trends.
- Personality profiles on major figures help you make smart cabinet appointments.
- A Teaching Guide provides discussion aids, worksheets, and research projects.

Visions of American History:

Struggles for Justice, Volumes 1 and 2

Videodisc presentations lift history off the text pages and into your students' lives!

6-12 AMIGA

GRADES

See human dramas in American life unfold before your eyes...hear the passionate voices of freedom, justice, equality...relive the trials and triumphs of Native, Latino, and African Americans, of women, immigrants, and labor. Do this and much more with Visions of American History.

Using the series' high interest minidocumentaries, you can help your students experience memorable "struggles" in American history that will motivate them to want to learn more. At any point in a video presentation, students can interact with the story—express their feelings and opinions, analyze and evaluate different sides of the situation, and draw conclusions.

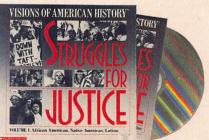

With its easily accessible format, students can also "browse" through the program on their own and further explore issues raised in the video presentations. They can go "behind the scenes" and access time lines, biographies, debates, animated maps, and charts.

Volume 1 portrays the struggles of Native, Latino, and African Americans. The second volume focuses on women, labor, and immigrants.

Discover for yourself how this highly motivating multimedia series makes history come alive as never before!

Components: One videodisc, ten 3.5" disks, 64-page Teacher Handbook. System Requirements: Amiga with 1 MEG

Requirements: Amiga with 1 MEG RAM, 20 megabyte hard disk, videodisc player.

Operation: Frog

An alternative to—or preparation for— 4-10 MAC NATIONAL M

This incredibly lifelike simulation of the dissection of an American bullfrog enables students to participate in every major step of dissection. They select the proper instruments—surgical scissors, probe, forceps, tweezers, and magnifying glass. They probe and snip body organs, remove them to the examination tray, and investigate frog body parts and systems. They can even observe how these body systems function in a living frog.

But the experience doesn't end there. Students can then reconstruct the frog. The organs must be replaced in the correct and logical order—starting with underlying organs in the dorsal layer and proceeding to the ventral layer. And when they are done, they see the frog jump off the screen. The new Mac and MS-DOS versions include fantastic new graphics, color, sound, and powerful new features like comparative anatomy and an online reference tool. *Operation: Frog* can be a viable alternative to traditional dissection or a valuable preparation for the real lab experience.

New Macintosh and MS-DOS Features

- · Fantastic new art, color, and sound
- On-line reference that enables students to point and click to identify organs
- Comparative anatomy option to compare frog and human anatomy
- Higher resolution graphics and more color with EGA, VGA, or MCGA
- Ad Lib sound board support (MS-DOS only)

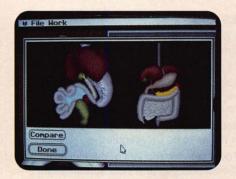

Components: One program disk (not copy-protected), Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Apple—64K, Macintosh—1MB, MS-DOS—384K with Color Graphics Card; joystick or mouse optional.

Screens shown are from new MS-DOS version.

Interactive NOVA

Bring the beauty and educational power of the award-winning WGBH science series NOVA to your classroom!

5-12 MAC

Designed especially for classroom use, *Interactive NOVA* enables your students to explore and discover science in an exciting new way. Combining the ease of pointing and clicking on a Macintosh® computer with quick access to motion video and still photography on a videodisc player, *Interactive NOVA* allows you and your students to focus on the topics most important to your curriculum. And hundreds of text and graphics cards provide depth and breadth on each of the subjects you explore.

But Interactive NOVA is not just a catalog of images and information. Multimedia activities let students discover the processes of science in an innovative, hands-on format. Multimedia tools enable you and your students to customize and create multimedia reports and presentations using images from the videodiscs. And teacher's guides provide lesson plans and ideas for both independent student projects and whole-class activities integrated into the curriculum.

Features

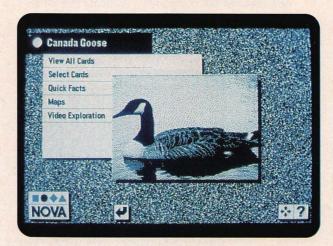

- A simple point-and-click interface gives you total control over all of the *Interactive NOVA* resources.
- Easy to use icons, cascading menus, and an interactive table of contents (the Navigator) enable you to move easily around the program.
- Short video segments, called Video Explorations, introduce topics to be investigated.
- Theme Tours provide models of the kinds of multimedia reports you and your students can create with ReportMaker.
- The VideoEditor lets you put together sequences of video clips and slides for customized video presentations.
- Lesson plans help you gradually introduce the various components of *Interactive NOVA*.
 Discussion questions are geared to different grade levels.

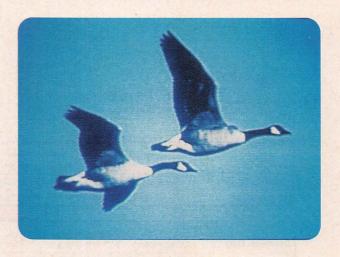

Components: 12" videodiscs; 3.5" Macintosh disks containing HyperCard* stacks; User's Handbook, Teaching Guide, icon reference chart, and information sheet

System Requirements: Macintosh computer with a 20 megabyte or larger hard disk; a videodisc player (Pioneer 2200, 4200, 6000A, 6010A, or 8000; Sony 1200, 1450, 1500, or 1550); a color video monitor (composite type); and RS-232 cables to connect videodisc player and Macintosh. Requires System 6.05 or higher.

Animal Pathfinders

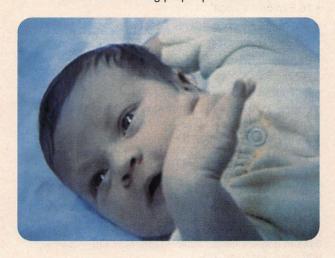

Learn about the interrelationships of animal species, their habitats, and their behaviors by taking a fantastic multimedia field trip! Examine the intricacies of a Salt Marsh, spend a year with the Rocky Mountain Elk or the California Sea Lion, discover what animals need to survive. These and hundreds of other animals, habitats, and behaviors come alive in your classroom with this rich collection of multimedia resources. Activities include an ecological adventure in which students travel to Florida to save the loggerhead turtles from extinction, a study of the intricate dances of bees in the hive, and a scientific investigation into the mystery of the migration of the monarch butterfly.

The Miracle of Life

The second title in the *Interactive NOVA* multimedia library enables students to explore human reproduction and sexuality at their own pace and without being intimidated. Featured topics include female and male reproductive systems, egg and sperm development, fertilization, fetal development, and birth. The sensitive issues of birth control and sexually transmitted diseases are available on an extra disk included in the package. In the Activity, students help a pregnant woman make decisions concerning proper prenatal care.

AWARD WINNER Animal Pathfinders

Critics' Choice, Finalist—Software Publishers Association

Best Secondary Education Program, Finalist— Software Publishers Association

Media & Methods Portfolio—*Media & Methods* Bronze Medal, Interactive Video—*International Film and Television Festival, New York* CINDY Silver Medal for K–12 interactive video productions

PEACE RIVER FILMS

The Annenberg/CPB Project

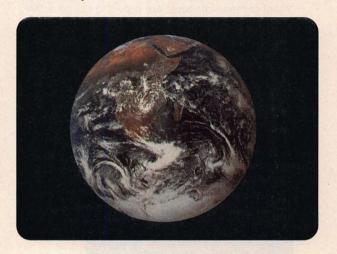

Interactive NOVA: Animal Pathfinders was developed by the WGBH Educational Foundation and Peace River Films, Inc., in association with Apple Computer, Inc. The Miracle of Life and Race to Save the Planet were developed by the WGBH Educational Foundation. Major funding for "Flace to Save the Planet" was provided by the Annenberg/CPB Project. Additional funding was provided by the Corporation for Public Broadcasting. Interactive NOVA is a trademark, and NOVA is a service mark, of the WGBH Educational Foundation. HyperCard and Macintosh are registered trademarks of Apple Computer, Inc.

Race to Save the Planet

Students are eager to confront the environmental problems facing the Earth. Yet they only have a surface understanding of the factors involved and of potential solutions. *Race to Save the Planet* helps students to understand the complex concepts of global ecology in a way that is both informative and easy to grasp. Water and air pollution, waste disposal, the global warming theory, citizen activism, and other topics are presented as worldwide issues and as case studies that illustrate how we are confronting the issues in specific parts of the world. Students learn about the interrelationships between environmental and economic decisions as they play the role of president of a juice factory in the Activity.

Transforms your classroom computer into a science learning lab!

The spirit of scientific inquiry is at the heart of these new computer-based activities. As they explore eight major topics found in most elementary science curricula, your students learn more about the world around them.

First students "discover" concepts as they conduct simulated experiments and investigations on the computer. Background information and reinforcement of these concepts are provided in interactive computer presentations and tutorials. And a series of 16 activity sheets, called Explorer's Logs, gets students thinking, talking, and writing about their experiences. Students make scientific discoveries in the same way scientists do: by investigating, thinking, hypothesizing, recording data, and drawing conclusions.

Each Volume Includes

- 4 Explorations
- 8 Tutorials
- 16 Explorer's Logs
- 8 at-home Science activity sheets
- 4 reproducible glossaries
- Content in health, life, physical, and earth sciences
- A comprehensive Teaching Guide

Volume 1, Grades 1–3, includes four programs: Plants • Weather • Shadows • Skeletons

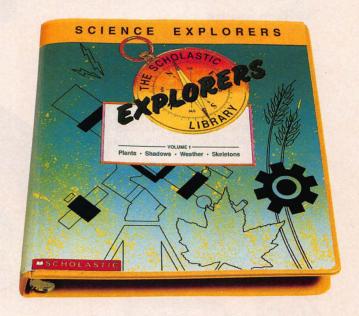

Volume 2, Grades 4–6, includes four programs: Animal Adaptations • Day, Night, and the Seasons • Simple Machines • Nutrition

Components: Four disks (not copy-protected), Teaching Guide with Explorer's Logs.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks.

System Requirements: Apple—128K, MS-DOS—256K with Color Graphics Card.

Agent USA

GRADES 4-8 É MS

Improves students' critical thinking and deductive reasoning skills

In this exciting interactive program, designed for classroom use by Tom Snyder, students travel with *Agent USA* on a cross-country mission to find and disarm the FuzzBomb before it fuzzes the entire nation. Students apply map-reading, geography, deductive reasoning, and critical thinking skills as they race across America helping *Agent USA* accomplish its dangerous assignment.

Components: One program disk plus backup, Teaching Guide, mapboard, poster, stickers, reference card.

System Requirements: Apple—64K, MS-DOS—128K. Does not run on MS-DOS resident machines. Joystick (on IBM PCjr. only). Color Graphics Card for MS-DOS.

Logic Builders

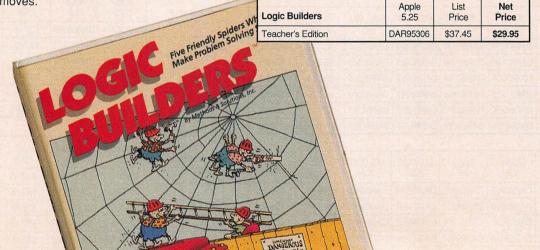

grades 2-6 ¢

Three ways to master pattern recognition and memory skills

This multilevel program challenges your students to improve memory skills and pattern recognition. They create or copy a geometric "web" using five of the many available shapes, and are rewarded as they learn to execute "web" designs faster and in fewer moves.

Components: One program disk plus backup, Teaching Guide, sketch pad, stickers.

System Requirements: Apple-48K.

Scholastic A.I.

An Experience with Artificial Intelligence

Students explore the question "Can computers really think?"

This fascinating program takes your students on a journey into the "mind" of the computer to see how it learns. Students begin by designing a game to play with the computer. At first they win easily. But a few rounds later, they sense that the computer is catching on. It has been monitoring their moves and learning from its own mistakes. Before long, the students find it impossible to win. The computer has beaten them at their own game!

A series of problem-solving modules guides students through the thought process the computer uses to develop its decision-making capabilities. This unique hands-on approach is ideal for teaching computer logic, expanding problem-solving skills, and awakening curiosity about the future of artificial intelligence.

GRADES M & MAC MAC MAC

Special Macintosh Features

- A digitized natural voice gives A.I. a "living" quality.
- The Brain vs. Brain option matches two computer brains against each other, enabling students to watch A.I. teach itself to play a game.
- The Auto-Goal feature enables students to change places with the computer, trying to learn the rules and goals of a game that the computer devises. A great critical thinking feature!

Components: One program disk (not copy-protected), Teaching Guide with Student Activities.

System Requirements: Apple—64K, MS-DOS—256K, Macintosh—512K. Also runs on Macintosh 512KE.

Scholastic A.I.	Apple 5.25	Apple 3.5	MS-DOS 5.25	MS-DOS 3.5	List Price	Net Price
Teacher's Edition	DAR82731	DAR82734	DAR82737	DAR82743	\$99.95	\$79.95
Additional Disks	DAR82733	DAR82736	DAR82739	DAR82745		\$22.50

Scholastic A.I.	Macintosh	List Price	Net Price
Teacher's Edition	DAR86157	\$112.45	\$89.95
Additional Disks	DAR86773		\$25.00

Students learn problem solving and decision making as they create their own contests to challenge *A.I.* When each contest is over, *A.I.* "learns" by storing the final position and comparing it with previous winning positions.

The unique Brainscan feature allows students to see the "thought process" A.I. uses to develop strategies for achieving goals and preventing opponents from reaching them.

Scholastic

pfs°: write

The word processor that prepares students for the "real world"

With Scholastic pfs: write and our superb support materials, even novices begin word processing immediately. In no time, your students format and print by selecting simple screen options—underline

and bold face text with a few keystrokes, write and edit in the same mode—and see on the screen exactly how their work will look.

Of course, the program includes all the features you expect in a professional word processor: search and replace, block editing, and more. Add to this a 60,000-word integrated spelling checker, and you have the most powerful multipurpose word processor available.

Components: One program disk, one Learning Activities disk (all disks not copy-protected); Teaching Guide. Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks. System Requirements: Apple—128K, MS-DOS—256K; printer.

Scholastic

pfs°: file/report

Business skills for the 90s—database management and data analysis

This powerful, professional package turns your classroom computer into a complete filing and reporting system. Students organize data to create clear, impressive reports and tables. Flexible search features enable them to search and recall information with ease and versatility.

With Scholastic pfs: file students can:

- Organize, sort, update, and retrieve data from their own files and from Scholastic's contentbased Activity Files included in the package
- Sharpen their reasoning, problem-solving, and organizational skills
- Learn the fundamentals of database management by completing the step-by-step lessons

7-12 🕳 🛤

GRADES

With Scholastic pfs: report students can:

- Hone their analytical, organizational, and communications skills as they put data into tables
- Sort, format, and print materials from files—often revealing new relationships in the data
- Show on screen how the printed report will look pfs is a registered trademark of Software Publishing Corporation.

Components: 5.25"—one file program disk, one report program disk, one Learning Activities disk; 3.5"—one file/report program disk, one Learning Activities disk (all disks not copy-protected); Teaching Guide.

Customized Lab Pack: Create a lab pack tailored to your own classroom needs with additional disks. **System Requirements:** Apple—128K, MS-DOS—128K; printer.

pfs: Curriculum Databases

Students conduct their own science and social studies research projects on the computer!

These content-based activity packages encourage students to work collaboratively as they examine key topics in science and social studies. Each package contains activities and the complete *Scholastic pfs: file/report* program.

Science

Physical Science Students analyze data on 75 different elements and 70 common substances and experiment with concepts such as electrical and thermal conductivity, relative density, and melting point. They also analyze 50 different substances and check results of four tests: flame, acid, starch, and borax bead.

Life Science Students study migration and feeding patterns of more than 23 species of birds. They also explore the relationships among body temperature, heart rate, and weight in more than 130 different animal species. And they study the biological systems of 90 animal species.

HOTS (Higher Order Thinking Skills):

Using Computers to Develop Thinking Skills in Students at Risk by Dr. Stanley Pogrow, University of Arizona

At last, a real alternative to remediation...

In this helpful guide, Dr. Stanley Pogrow introduces HOTS, a general thinking skills curriculum that teaches students how to learn information and concepts the first time they are taught. Pogrow's techniques rely heavily on the power of computers to motivate student interest and on the ability of talented teachers to stimulate critical thinking in problem-solving environments.

Research findings, detailed in the book, show dramatic results. Over the past seven years, HOTS students have achieved higher scores on standardized reading and math tests than national averages, and some students have been rediagnosed as gifted.

Dr. Pogrow also shares with readers the underlying learning theory behind HOTS and provides practical guidelines for implementing the HOTS techniques. In addition, he offers suggestions for using these techniques with gifted and learning disabled students.

Teachers, administrators, and computer coordinators will find ample "food for thought" in this well-documented book. More importantly, educators will discover an exciting, viable alternative to remediation. The success of HOTS clearly demonstrates that powerful educational intervention can be designed to channel the intellectual potential of students at risk.

The Scholastic HOTS Link by Gila Gevirtz

Teachers interested in applying some of the highly successful HOTS techniques to their own curriculum will find helpful suggestions in this book. HOTS teachers, too, will discover exciting ideas for using Scholastic software to expand beyond the software recommended in the HOTS general thinking skills curriculum.

The book begins with a brief overview of the key principles of the HOTS approach. The rest of the book presents practical ways to use Scholastic software in combination with HOTS techniques. Examples are provided, using Scholastic software in content areas as diverse as reading and science, as well as tools such as word processing and classroom publishing programs.

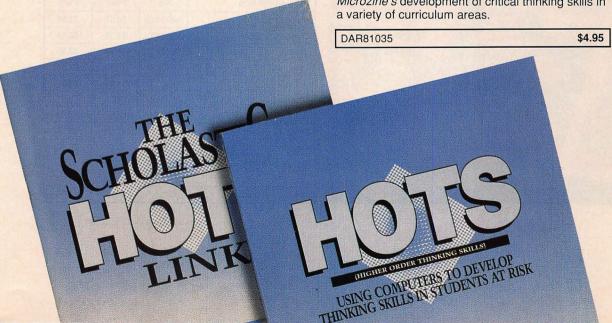

Teachers will find valuable tips for improving students' thinking skills and ability to transfer, or generalize, concepts they learn. Included are suggestions on how to conduct probing conversations that develop students' ability to analyze and solve problems.

The Microzine Guide to Critical Thinking

This practical guide includes activities that build on *Microzine's* development of critical thinking skills in a variety of curriculum areas.

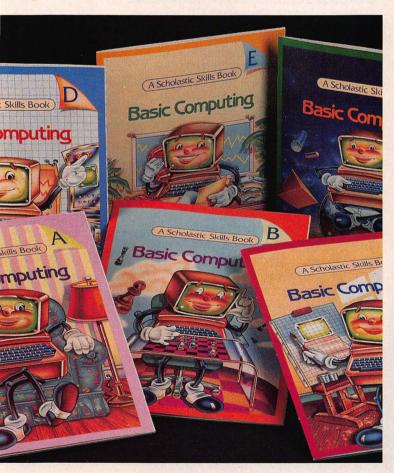

Basic Computing

GRADES 1-6

A complete computer literacy curriculum for the elementary grades

Prepare your students for the new technology with this complete computer literacy package. Whether you want to familiarize students with the computer before they approach the keyboard, or you simply don't have enough computers to go around, *Basic Computing* is the answer to step-by-step teaching of computer literacy—with or without hands-on experience.

With an emphasis on critical reasoning and problem-solving skills, *Basic Computing* 64-page workbooks assume no previous knowledge of computers. In each Annotated Teacher's Edition, there's a handy skills chart to help you track students' progress and pinpoint problem areas. (*Basic Computing* skills are compatible with all microcomputers.)

Grade 1

Identifying computer tasks and unique characteristics; parts of a computer; using computer vocabulary; telling a computer what to do; recognizing user errors; logical sequencing for computer tasks; flowcharting; using LOGO; finding errors; classifying.

Grade 2

Reviews skills presented in Grade 1. New skills include choosing appropriate tools and procedures for problem solving; giving clear directions.

Grade 3

Reviews and applies skills in Grades 1 and 2. New skills include using BASIC; selecting appropriate programs; naming programs.

Grade 4

Applies skills presented in Grades 1, 2, and 3. New skills include identifying computer functions (input, memory, process, output); telling computer to print words, to put things in order; editing errors.

Grade 5

Applies skills presented in Grades 1–4. New skills include identifying uses of computer in business, transportation, entertainment, etc.; identifying computer-related jobs.

Grade 6

Applies skills presented in Grades 1–5. New skills include recognizing social and other nontechnical implications of using computers.

Components: One 64-page workbook for each grade level and corresponding Annotated Teacher's Edition.

Network software for every grade... every subject... every network!

Scholastic offers more curriculum-based network software for more different networks than any other publisher. Our network programs span the curriculum. They take full advantage of your network with unique features like electronic mail and options like printing and saving locally or on the network. And they are available for all major networks: AppleTalk, Novell/ICLAS/Tandy SchoolMate, Corvus/Velan, and Digicard.

Introducing...

Scholastic Network Curriculum Centers Exciting network software collections at 20% off!

These collections provide your school with powerful network curriculum environments. Each collection features our most popular network programs and a companion activity guide book with ideas about using the software in the classroom. And each costs 20% less than if you purchased the programs separately!

The Scholastic Network Writing Center

In addition to the best-selling Bank Street Writer, this collection includes Write On! activity files and either Success with Writing or Scholastic Process Writer. Your students will have at their fingertips a powerful and versatile word processor, a writing coach to guide them through the entire writing process, and a set of creative exercises and activities that spark imagination and foster collaborative learning.

The Scholastic Network SuperPrint Center

Establish a versatile printing press on your network with the popular *SuperPrint II*, 4 *Graphics Packs*, and 4 *Graphics Activity Packs*. With this powerful yet easy-to-use classroom publishing environment,

students and teachers have access to hundreds of graphics without the need to constantly swap disks. Soon everyone in school will be designing and publishing their own banners, Big Books, posters, greeting cards, and more.

The Scholastic Network Math Center

Now the entire *Math Shop Series* can be open for business on your network. The series enables students to apply their math skills in a fun "realworld" environment: the shopping mall. As they help out in a variety of different stores, students gain a real sense of how math is applied in everyday life. Includes *Math Shop, Math Shop Spotlight: Weights & Measures, Math Shop Spotlight: Fractions & Decimals I, and either <i>Math Shop Jr. or Algebra Shop.*
